## **Detailed Action**

### **Response to Arguments**

Applicant's arguments, filed September 29<sup>th</sup>, 2008, with respect to the 103 rejections of the claims have been fully considered and are persuasive. The 103 rejections of the claims have been withdrawn. The applicant successfully argued that Pingel in fact teaches away from what is claimed in the instant application.

### **Reasons for Allowance**

**Claims 1, 2, 4, 5, 7, 8, 10, & 11** are allowed.

The following is an examiner's statement of reasons for allowance:

As to **Claims 1, 2, 4, 5, 7, 8, 10, & 11**, the prior art of record, taken alone or in combination, fails to disclose or render obvious the formula as it stands claimed in the instant application results in the number of pixels per grid being a non-integer number, in combination with the rest of the limitations of the claim. The number of pixels being a non-integer number leads to certain advantages as is argued by the applicant. Pingel, the nearest art the examiner could find has the number of pixels per grid always being an integer and teaches away from using non-integer numbers of pixels.

### **Conclusion**
